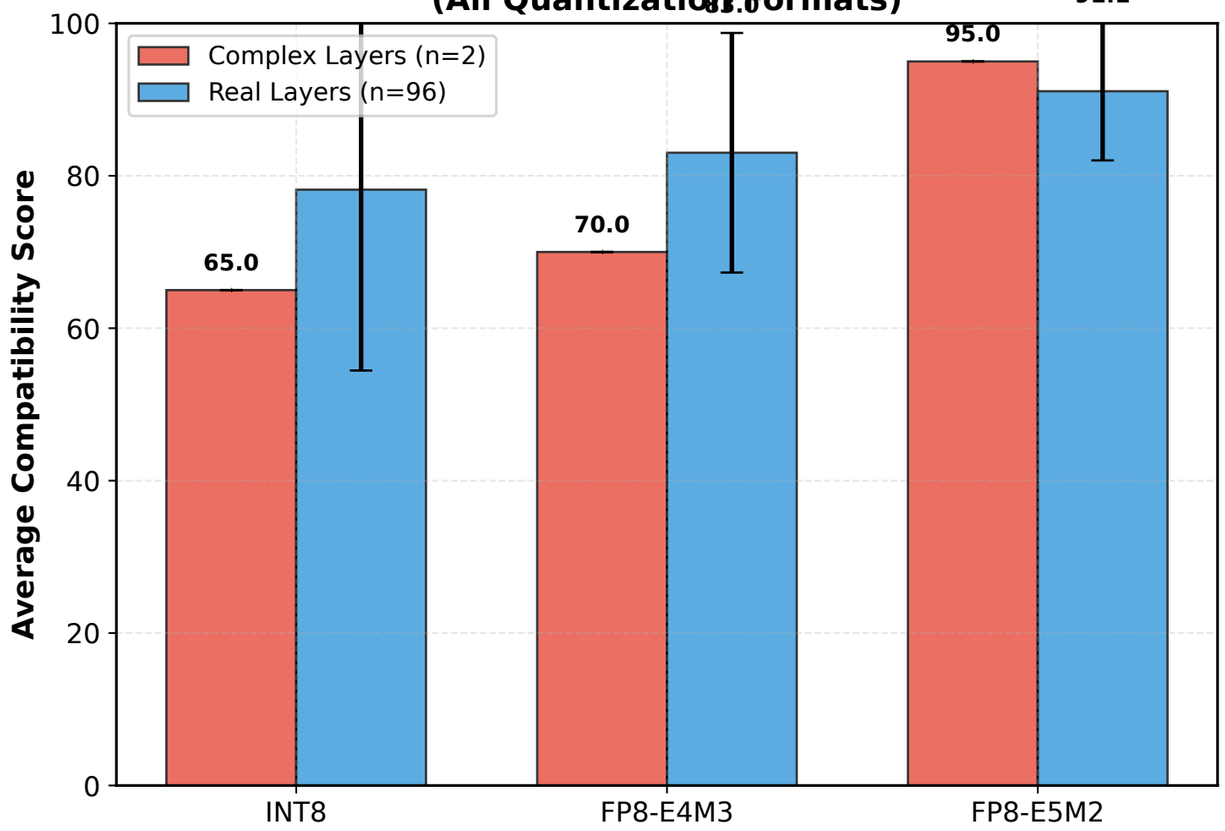
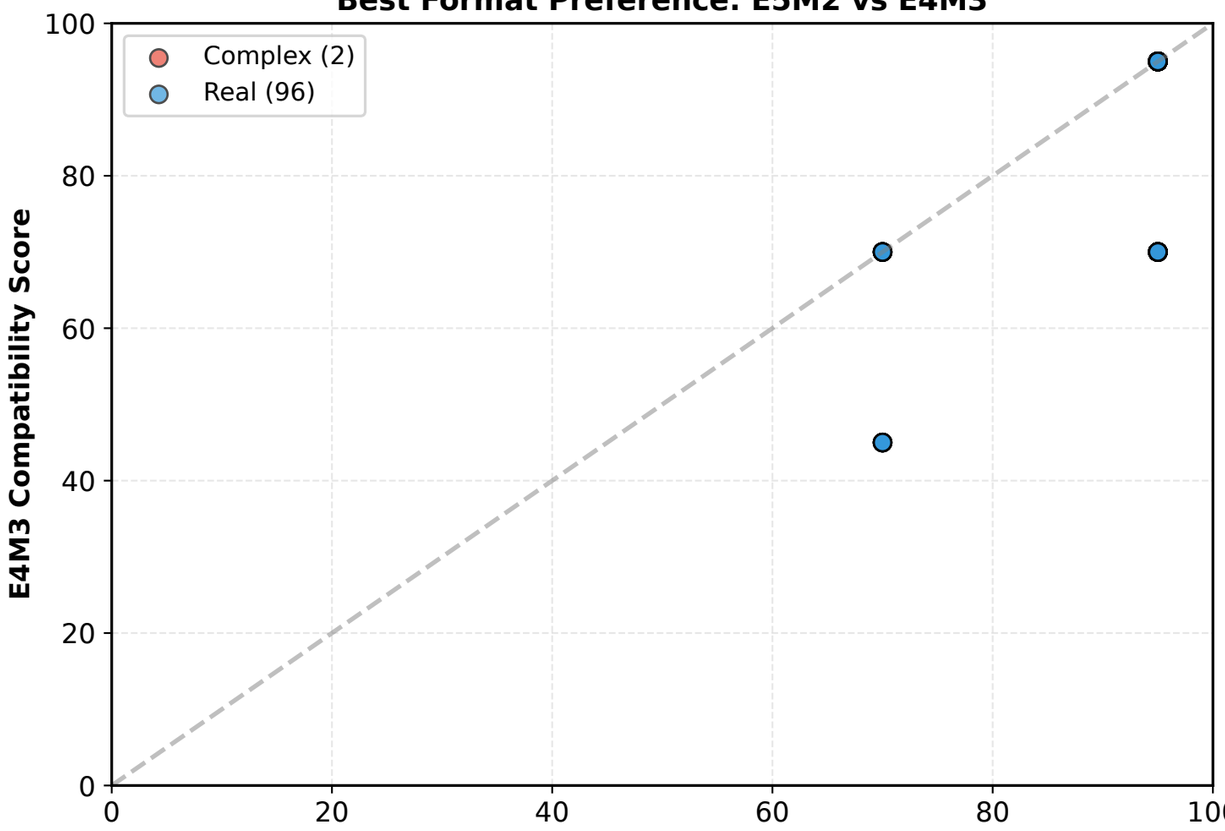
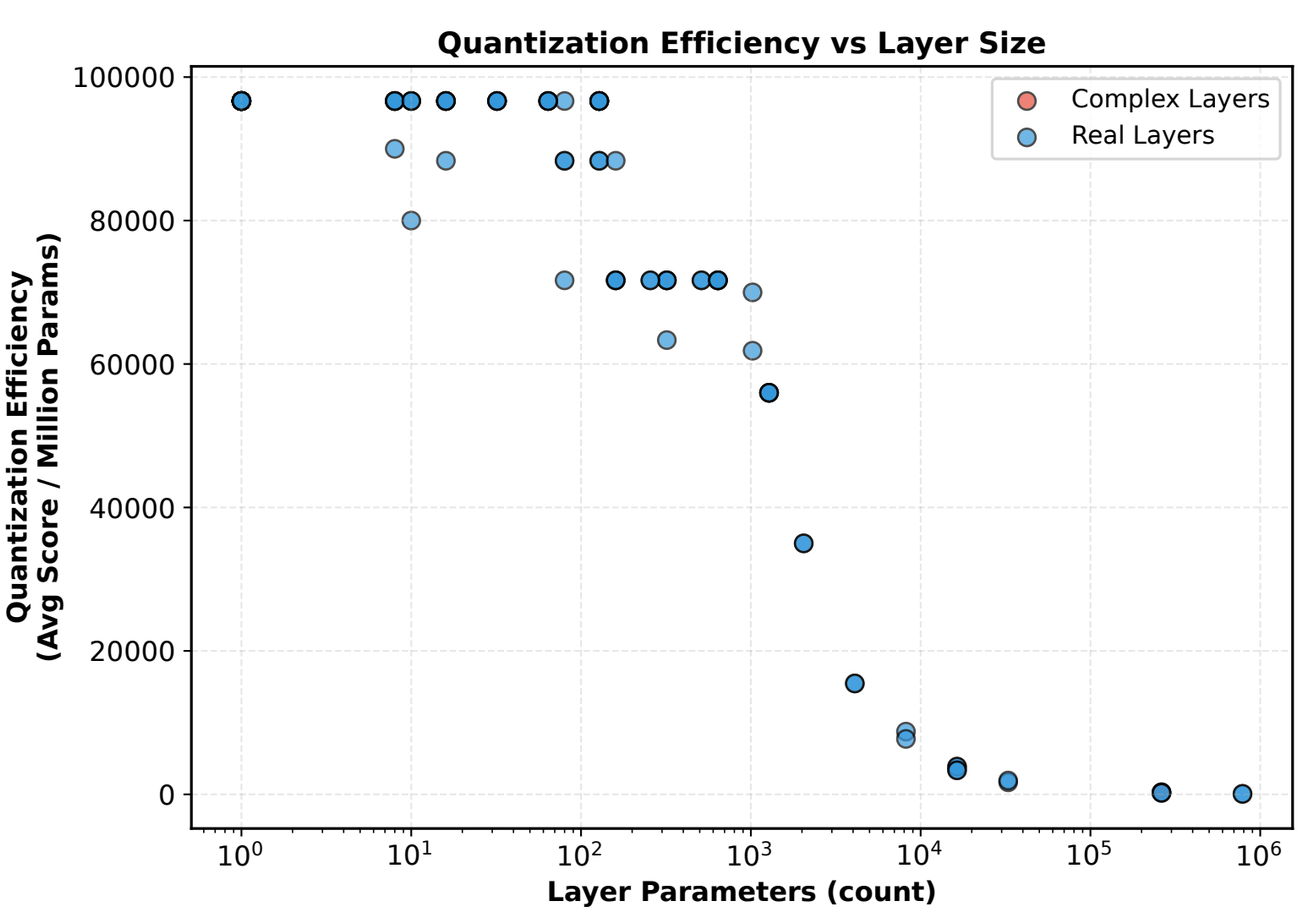
Enhanced Complex vs Real Layer Analysis for Multi-Format Quantization







COMPLEX vs REAL LAYER ANALYSIS

LAYER DISTRIBUTION:
- **Complex layers: 2 (2.0%)**
- **Real layers: 96 (98.0%)**

BEST FORMAT BY TYPE:
- **Complex layers: E5M2 (95.0 avg score)**
- **Real layers: E5M2 (91.1 avg score)**

QUANTIZATION STRATEGY:
- **Balanced model**
- **Standard quantization suitable**
- **Block quantization especially beneficial**

IMPLEMENTATION NOTES:
- **Complex layers may need special handling**
- **Consider magnitude-only inference for speed**
- **Mixed precision likely optimal approach**
