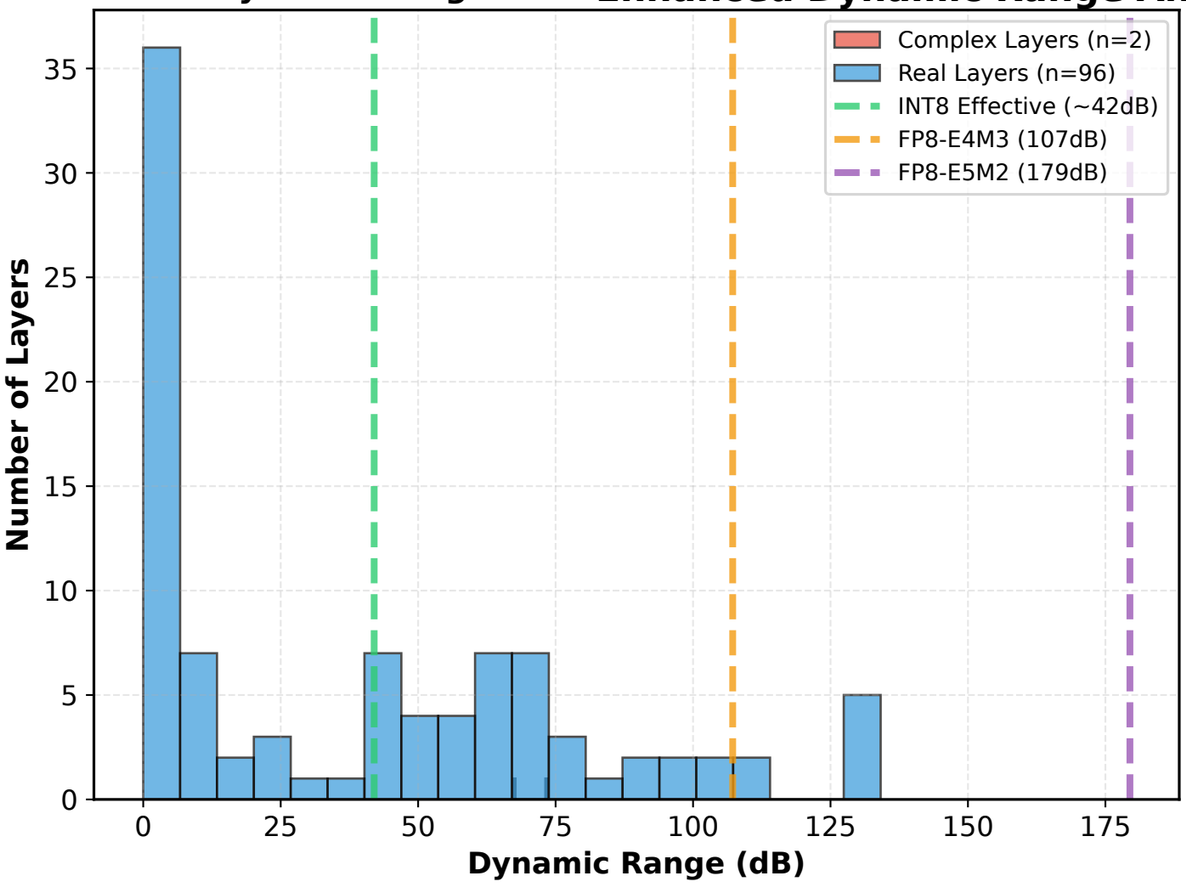
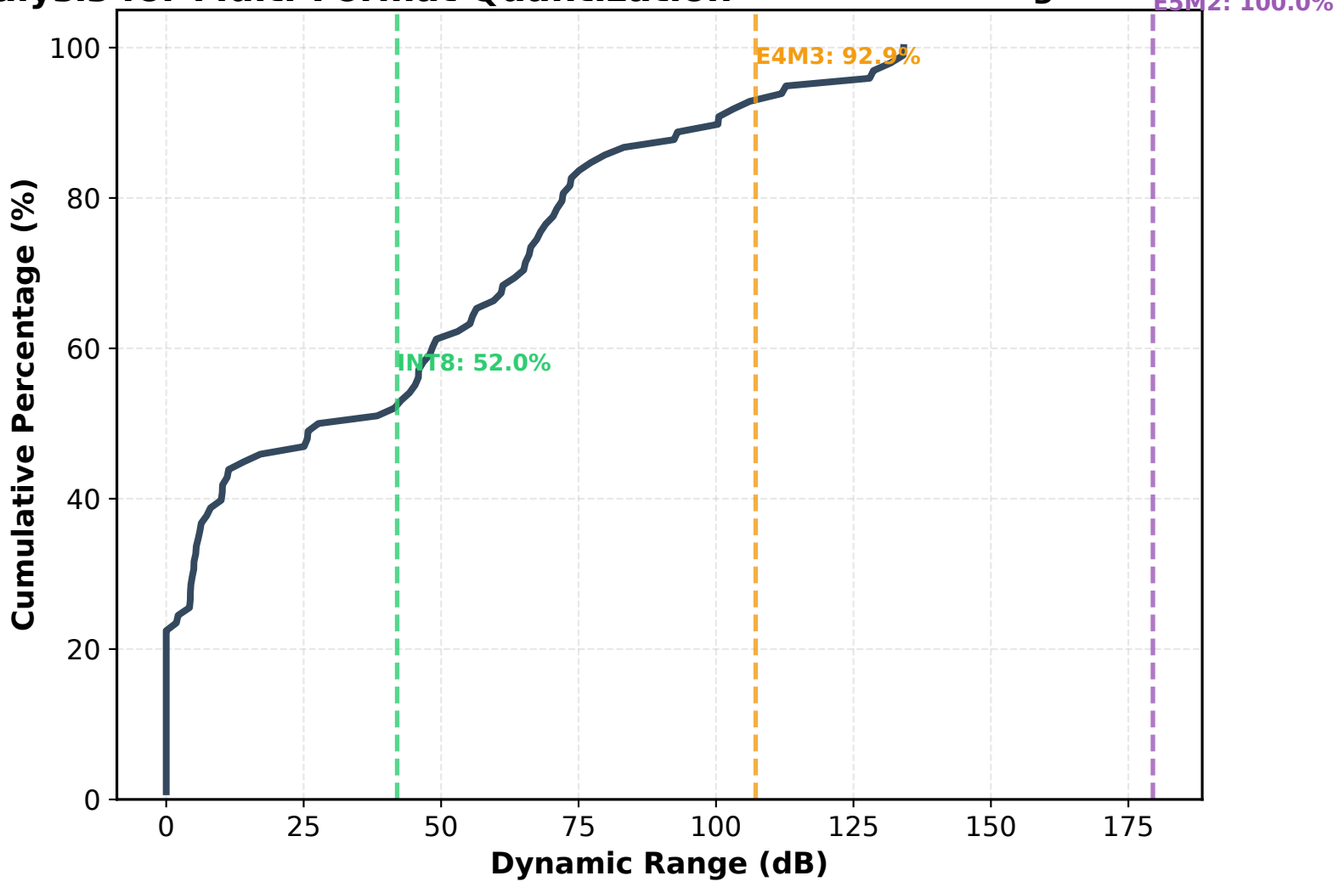
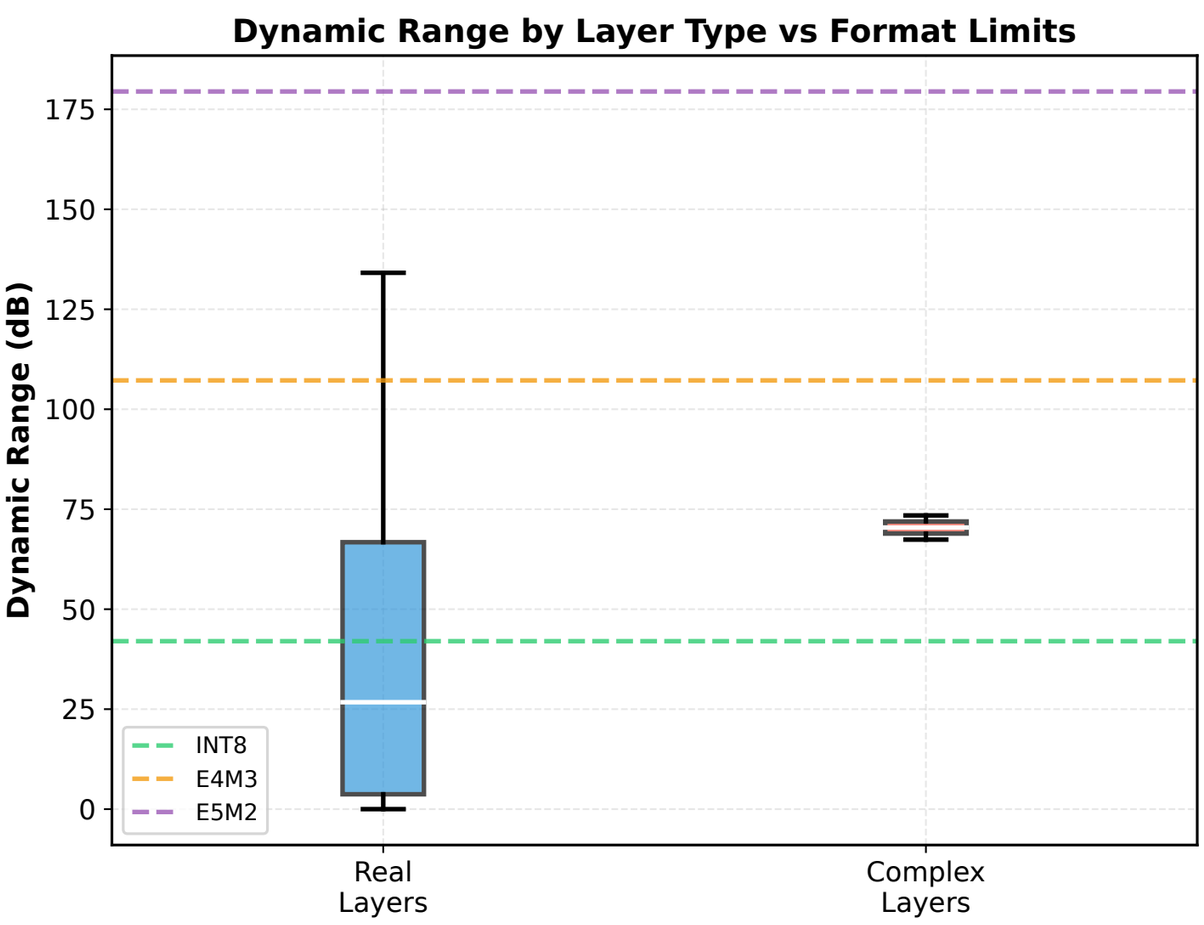
Enhanced Dynamic Range Analysis for Multi-Format Quantization







DYNAMIC RANGE ANALYSIS SUMMARY

LAYER COVERAGE BY FORMAT:
- **INT8 (≤42dB): 52.0% of layers**
- **FP8-E4M3 (≤107dB): 92.9% of layers**
- **FP8-E5M2 (≤179dB): 100.0% of layers**

STATISTICS:
- **Total layers: 98**
- **Median range: 33.0 dB**
- **Max range: 134.1 dB**
- **Complex layers avg: 70.4 dB**
- **Real layers avg: 39.4 dB**

RECOMMENDATIONS:
- **FP8-E5M2 has best coverage**
- **Block quantization recommended for layers >60dB**
- **Mixed precision may be optimal strategy**
